## About work

Use of this project: It can be used in lip sync look here for more detail

[https://www.youtube.com/watch?time\\_continue=129&v=9Yq67CjDqvw](https://www.youtube.com/watch?time_continue=129&v=9Yq67CjDqvw) and

<http://grail.cs.washington.edu/projects/AudioToObama/> and also for right positioning for better pronunciation

Technology used: This animation is made with **phoria.js** . why we use **phoria.js** instead of **Three.js** or anyother, because phoria does not use **webgl**,this resulting in easily support to any browser.

Area where it can be improved: Implementing all feature of [first part](#) to [this](#).Adding feature like real time speech recognising and showing it position in model.

Code repo:[project](#) . ([res2](#),[res1](#))
